

Grass Minimum Temperatures recorded at Armagh Observatory  
1951-1987

Grass minimum temperatures for the period 1951-1987 were extracted from a file of Armagh Met Data originally typed in by Planetarium staff. The reasons for this are not clear to me in 2022 and I am not aware of the data being used since. Daily Grass Minimum temperatures continue to be made at Armagh and can be found on the climate website: [climate.armagh.ac.uk](http://climate.armagh.ac.uk)
