28.20 - 28.51 - 28.92

The last night and this day till
4 P.M. has been a time - when
"a child might understand

"The Devil had business on his hand"

Indeed such a wind never blew in
my remembrance - Indeed (and no doubt
all the country) is nearly unroofed. the
Sheds are full of broken staves, chimneys,
Tops, Rigging &c - Trees are laying in
all directions - some of which I have known
from my earliest infancy and I saw
the top of them as I would do that of
my right arm or the very apple of my
eye - Alas! alas! - The roof of a
House in Entry Lane was carried completely
in by the falling of the chimney but
fortunately no lives were lost

(Some seen this forenoon - left dark
with the wind still rattling along
till 4 p.m. when a little snow came
to settle it) - Folks say there has
been very vivid lightning for 4 or 5
nights back, but I have not observed
it -
